## Preparation of Financial Statements

## Remember:

- Income Statement - measure profit for period
- Balance Sheet - Shows what assets and liabilities the business has
- Statement of Cash Flows - Sows where cash has come from and how it has been spent over a period

## When preparing financial statements:

- Carefully read the question and find out what you need to do
- Determine if it is for a trading firm or a service firm as this will affect the layout of your income statement. A trading firm has sales in their income where as a service firm has fees received.
- Complete the balance day adjustments.
- Classify the items on the trial balance. Remember that Expenses, Drawings and Assets are always on the debit/left side of the trial balance and Liabilities, Income and Owner's Equity are on the right/credit side of the trial balance.
- Accumulated Depreciation is a contra (like a negative) asset and Drawings reduces Owner's Equity.
- Complete the financial statements.
- Remember to complete as much as you can in the headings that you know.
- When preparing financial statements never abbreviate and always use the actual name used in the trial balance.

## Service Firm

- Service Firm - that is a firm that provides a service, and does not buy and sell a product.

## Classification of Elements:

- All revenue/income for a service business is listed under the one revenue heading.
- Group One expenses - the name of this expense category will be provided and will be appropriate to the service firm being assessed, e.g. Plumbing Expenses for a Plumber. These are comprised of Distribution expenses (as per trading entity) and any other expenses specific to the provision and delivery of the service.
- Administrative Expenses and Finance Costs - see Income Statement for a trading Firm
- The balance sheet will be the same as for a trading firm

## Trading Firm - Layout

- Trading Firm - that is a business that buys and sells a product

## Balance Day Adjustments

Balance day adjustments arise because the life of a business is broken down into smaller periods (period reporting) and profit is determined in those periods by subtracting expenses from revenues. Some transactions are not fully completed and need to be included into the accounting period in which they relate (accrual accounting). The result is transactions which are incomplete on balance day, or which relate partly to different periods.

| Adjustment | Income Statement | Balance Sheet |
| :--- | :--- | :--- |
| Amounts owing(due or <br> accrued) for expenses | Add to relevant <br> expense | Record Accrued Expense <br> as a current liability |
| Amounts owing (due or <br> accrued) for income | Add to relevant <br> income | Record Accrued Income as <br> a current asset |
| Amounts paid in <br> advance for expenses | Subtract from <br> relevant expense | Record as Prepayment in <br> balance sheet |
| Amounts received in <br> advance for income | Subtract from <br> relevant income | Record as Income in <br> Advance in balance sheet |
| Depreciation | Create depreciation <br> expense on (name <br> of relevant asset) | Add Depreciation to relevant <br> Accumulated Depreciation. <br> Subtract new total amount off <br> Accumulated Depreciation <br> from the PPE in the PPE <br> note |
| Invoices on hand for <br> credit sales | Add GST exclusive <br> amount to sales | Add full amount (or create <br> account) to Accounts <br> Receivable. Add GST <br> amount to GST Payable |
| Invoices on hand for <br> credit purchases | Add GST exclusive <br> amount to <br> purchases | Add full amount to Accounts <br> Payable. Subtract GST from <br> GST Payable |
| Invoices on hand for <br> credit purchase of <br> property, plant and <br> equipment | Add GST exclusive amount <br> to property, plant and <br> equipment item. Add Full <br> amount to Accounts <br> Payable. Subtract GST <br> amount from GST Payable. |  |
| Write off Bad Debts | Add bad debts as a <br> administration <br> expense | Subtract full amount from <br> Accounts Receivable and <br> subtract GST from GST <br> Payable |
| Adjusting/creating <br> debsance for doubtful <br> debts <br> administration <br> expense | Add/subtract amount from <br> Allowance for Doubtful <br> Debts in Note to Accounts <br> Receivable |  |

## Cash Flow Statement

This statement shows the sources and uses of cash during a period of time and the resulting cash position of the business. It only includes cash items (either cash in or cash out).

It does not include non-cash items such as:

- Depreciation
- Gain/loss on sale - record the actual cash received from the sale
- Invoices on hand
- Drawings of goods

## Note:

You may need to calculate cash received from Accounts
Receivable/Customers on account by reconstruction the accounts Receivable ledger, or following this process:

Start with

- Opening Accounts receivable balance 100,000

## Add:

- Credit Sales $\underline{800,000}$

Subtract:

- Bad debts 20,000
- Discount Allowed 10,000
- Closing accounts Receivable Balance 600,000 630,000
= Cash Received form Accounts Receivable 270,000

You may also need to calculate cash received from Accounts Payable by reconstruction the Accounts Payable ledger, or following this process:

## Start with

- Opening Accounts Payable balance 200,000

Add:

- Credit Purchases $\underline{\underline{300,000}}$

Subtract:

- Discount Received 10,000
- Closing accounts Receivable Balance 200,000 210,000
= Cash Received form Accounts Receivable 290,000
